

Assumptions

- 1- All restaurants can be closed on some days.
- 2- User may have no orders.
- 3- One of the menu items may not belong to any orders.
- 4- One of the menu items may be placed in any orders.
- 5- At least one promotion can belong to one order.
- 6- One of the orders may not have any promotions.
- 7- Existence of promises does not imply that there are orders.
- 8- Some responses may be used for different reviews by different restaurants.

Note about Surrogate Key

In entities having surrogate keys, since individual attributes or combination of these attributes existing in original text cannot be represented as primary key, surrogate keys have created.

MenuItems	Orders	Promos	Restaurants	buys	Users	Response
